

Frank Mckenna,

**I know that visiting XXXX would be a more effective way to reach in case you don't take action** Look familiar?

It's important you pay attention to this message right now. Take a minute to relax, breathe, and really dig into it. 'Cause we're about to discuss a deal between you and me, and I ain't playing games. You don't know anything about me however I know ALOT about you and right now, you are thinking how, correct?

Well, You've been a bit careless lately, clicking through those adult videos and venturing into the darker corners of cyberspace. I actually placed a Spyware called "Pegasus" on a app you frequently use. Pegasus is a spyware that is designed to be covertly and remotely installed on mobile phones running iOS and Android. When you were busy watching videos, your smartphone started working as a RDP (Remote Control) which provided me complete control over your device. I can peep at everything on your screen, flick on your cam and mic, and you wouldn't even notice. Oh, and I've got access to all your emails, contacts, and social media accounts too.

**What have I done?**

Been keeping tabs on your pathetic life for a while now. It's just your misfortune that I stumbled across your bad deeds. I invested in more days than I should've investigating into your data. Extracted quite a bit of juicy info from your system. and I've seen it all. Yeah, Yeah, I've got footage of you doing embarrassing things in your room (nice setup, by the way). I then developed videos and screenshots where on one side of the screen, there's the videos you had been enjoying, and on the other half, it is you jerking off. With just a single click, I can send this filth to all of your contacts.

**What can you do?**

I feel your worry and confusion. Actually, I want to wipe the slate clean, and let you get on with your daily life and wipe your slate clean. I will offer you two options. Either ignore this warning (not recommended) or pay me a small fee. Let's examine above two options in more detail.

Option 1 is to disregard this e mail. Let's see what is going to happen if you select this path. Your video will get sent to your contacts. The video was straight fire, and I can't even fathom the embarrassment you'll face when your colleagues, friends, and fam see it. But hey, that's life, ain't it? Don't be playing the victim here.

Second Option is to pay me, and be confidential about it. We'll name it my "privacy tip". Now Lets discuss what will happen if you choose this option. Your dirty secret will remain private. I will destroy all the data and evidence once you send payment. You have to make the payment via Bitcoins only. Pay attention, I'm telling you straight: 'We gotta make a deal'. I want you to know I'm coming at you with good intentions. I'm a person of integrity.

**Amount to be paid: \$2000**

**BTC ADDRESS IS:** 1BG7CZ4T8cNfCpDeriwv7nxanZMd5Ae525

Or, (Here is your Bitcoin QR code, you can scan it):

Once you pay up, you'll sleep like a baby. I keep my word.

**Notice:** You got one day to sort this out. (I have a unique pixel within this e-mail, and right now I know that you have read this email). My system will catch that Bitcoin payment and wipe out all the dirt I got on you. Don't even think about replying to this, it's pointless. The email and wallet are custom-made for you, untraceable. I don't make mistakes, Frank. If I catch that you've shared or discussed this email with someone else, your shitty video will instantly start getting sent to your contacts. And don't even think about turning off your phone or resetting it to factory settings. It's pointless.

Honestly, those online tips about covering your camera aren't as useless as they seem.

Don't dwell on it. Take it as a little lesson and keep your guard up in the future.
