Ok, let's say you're a little hacker geek that needs money...fast. You've seen people at school pumping money into the great Pepsi god to feed their caffine addictions and dreamt about all the money they make. First, Pepsi is a drug dealer. Caffine is in Pepsi. Caffine is a drug. Drugs are evil(so sez George). So, by the substitution postulate(I have been paying attention in class!!!) Pepsi=evil. Right????

The getting of the money is actually pretty easy. You just have to know where to look.

Ok.. so the drawing's a little messed, but you get the idea...

There should be a little opening on the side. The next step is the hardest part. Reach into the hole and reach up as far as you can. You should feel a vinyl bag. You're going to want to pull this out. THIS IS NOT EASY!!! Be patient. If you work long enuff, it will come. It helps to be skinny(like me)... Once it's out, all you have to do is chop it open. I know at my school I've made \$50 in one night off of 2 machines without any effort at all.

NOTE This only works on the older, non-bubbled-front machines

On the newer machines, that have the coolin' picture on the front, it's super easy to get free pepsis (but I'm not sure about the money). Just open the flap that the cans come out of and feel around. Usually there are a couple of six packs there for storage. Pull them out of the plastic rings and you're set. HAVE FUN!!!!
