

SIC Presents  
VISA HACKING

Written by Hellrat of SIC  
3-91

You are probably wondering what I mean when I say Visa Hack? Well actually a baby could do this, its so easy... well you have 2 types of visa formats they are:

xxxx-xxxx-xxxx  
xxxx-xxx-xxx-xxx

Now with thez formats you can generate 10 cards and they will work and you have 1 original with the experation date.. so for example I'll use this visa card (which worx)

4502-288-854-699  
ex. date 9-92

ok this is the eazy way to do it and the only way.. now you have thoz #'z to work with.. watch close!

4502-288-854-699  
^^^

123

I numbered thoz last 3 digits 1,2,and 3... you will only change thoz last 3 digits.. now watch

4502-288-854-699  
^^^

123

590

491

392

You take #1:  
you will lower that digit by 1 number each time...

You take #2:  
you keep that number the same ALWAYS!

you take #3:  
you raise that 1 number everytime..

Thatz all there is to it... now you are probably wondering about the ex.date right? well, the ex. date was 9/92 on the 1st card.. you have now generated 10 new cardz.. you should have this.

4502-288-854-699  
4502-288-854-590

4502-288-854-491  
4502-288-854-392  
4502-288-854-293  
4502-288-854-194  
4502-288-854-095  
4502-288-854-996  
4502-288-854-897  
4502-288-854-798

thoz are the cc#'z.. now the experation date again was:  
9/92 for the first card... so guess what! you keep the ex. date  
the same on every card...

well.. thatz it for now.. but if you have any problems with  
understanding it call:
