

They're Hiding Scam Centers In The Mountains

We were transferred from Wanhai #华盛园区 in Myanmar two days ago. Dozens of us were handcuffed and followed along. More than 10 pickup trucks were fully armed with AKs and rockets.

We were escorted to a well-hidden forest more than 40 kilometers away. The brown iron house was about four or five meters high. I heard that this is a tourist area near #白马镇. It seems that there is also a Baima Temple, which belongs to Beichanbang or Dangyang . It is very remote and most of it is blocked by trees.

At present, the Huasheng Park has basically been moved one after another, leaving no clues. They have all been moved to a small park on the mountain. This park has not been built yet, and there is no network signal. It is possible that they are hiding from China's crackdown and will move back later.

It is extremely cruel and horrible here, there is absolutely no humanity at all. You work 18-19 hours a day, and if you don't have any performance, you will be fired without any further ado. There are people crying out in the office every day, and if you really don't have any performance, you will be sold to another, even darker park at a high price.
